

Installing Elementor Pro

Congratulations on signing up for Elementor Pro. This guide walks you through the entire process of installing and activating Elementor Pro on your WordPress site.

Note: Elementor Pro is an extension of Elementor, so you **must** have Elementor installed. If you still haven't installed Elementor, check out this installation guide ([//docs.elementor.com/article/14-installation](https://docs.elementor.com/article/14-installation)).

- 1 After purchasing **Elementor Pro**, go to my.elementor.com (<http://my.elementor.com/>)
- 2 Login with the details you received in the email after purchase
- 3 After the login, you will reach the 'My Account ([//docs.elementor.com/article/416-elementor-s-my-account-area](https://docs.elementor.com/article/416-elementor-s-my-account-area))' page. Click on the **Download Plugin** button in the lower My Account section and download the .zip file to your desktop
- 4 Head over to your site, to the *WordPress dashboard*, and click on **Plugins > Add New**. Choose the zip file you have just downloaded. Click on **install** and activate
- 5 On the top of your site's dashboard, you should get a message telling you to activate your license key.
